

Hello scholars, the **Third Quarter** project is to research an African American scientist or inventor. Don't fret. Follow the below instructions. Make sure to include all the components to get the best grade possible.

1. Make a slideshow with 7 or more slides
2. The first page should be the title page (include your name bottom right corner)
3. The second page should include the name of the person you will present on with their date of birth and death
4. The third page, will be about the person's family life
5. The 4th slide will be about the persons education
6. The 5th slide will be about the person's accomplishments
7. The 6th slide will be about any obstacles the person had to overcome
8. The last slide will be a conclusion of your research.

Presentations should include pictures. We will begin presentations on March 8 and conclude on March 15. The presentation should last 3-4 minutes, I will have you share your screen so the entire class can see the presentation.

Please do not share the slide presentations with me.

Speaking and Listening is a standard that is required and is graded, so speak clearly and with fluency.

Failing grades will be a result of no presentation (55)

7 components 100-91

6-5 components 90-81

5-4 components 80-71

4-3 components 70

3 or less components 65
